

## Wi-Tronix®, LLC Systems Selected for CN's Entire Fleet of Locomotives

February 14, 2012 - (Bolingbrook, IL) Wi-Tronix®, LLC announced today that they have entered into a contract with CN for fleet wide deployment of Wi-Tronix suite of locomotive remote monitoring solutions. CN will be installing Wi-Tronix systems on new locomotive purchases as well as retro fitting its fleet of locomotives with Wi-PU's. The Wi-Tronix system provides CN with the benefits of ready access to locomotive on-board data, fuel conservation monitoring and improved fleet productivity. Since Wi-Tronix was selected as CN's preferred remote monitoring solutions provider in 2007, over seven hundred systems have been applied on CN's newest EMD SD70M-2 and GE ES44DC and recently rebuilt GP38-2 locomotives.

CN leadership will continue to use Wi-Tronix's Wi-Tracker™ to maximize both locomotive asset utilization and fuel efficiency. Wi-Tracker provides a full suite of tools such as: statistics on utilization, engine shut down and duty cycle, fuel monitoring, locomotive fault and exception-based alerting, geo-mapping, and more. Additionally, CN will save countless hours of invaluable time using Wi-DownloadER that provides remote access to download locomotive on-board data from any locomotive, anytime, anywhere. .

CN will also benefit from automatic monitoring of locomotive digital video recorder health and operating status. Wi-Tronix, ultrasonic fuel sensors will provide CN with real time information such as fuel levels, fuel inventory, refuel events and low fuel alerts. Wi-Tronix array of mobile asset management tools, proven integration experience and customer service is being deployed to support CN's revolutionary business objectives aimed to increase fuel efficiency which is one of the key pillars to its Ecoconnexions Sustainability Program aimed at reducing CN's carbon footprint.

"Wi-Tronix Wi-PU places invaluable information at the fingertips of CN management." The Wi-PU features seamless roaming between the US and Canada using both cellular and Wi-Fi communications.

### **About Wi-Tronix, LLC:**

Wi-Tronix, LLC, headquartered in Bolingbrook, IL, provides products and services to wirelessly monitor high-value mobile assets used in rail, marine and other commercial and industrial operations.
