

Wi-Tronix[®], LLC Systems to be Installed for Entire Fleet of Kansas City Southern Locomotives

August 15, 2012 - Wi-Tronix[®], LLC (Bolingbrook, IL) announced today that they have entered into a contract with Kansas City Southern Railway & Kansas City Southern de Mexico for fleet wide deployment of Wi-Tronix suite of locomotive remote monitoring solutions. KCS will be installing Wi-Tronix systems on new locomotive purchases as well as retro fitting over 750 locomotives with current Wi-Tronix solutions. The Wi-Tronix system provides KCS with the benefits of ready access to locomotive on-board data, fuel conservation monitoring and improved fleet productivity. KCS will implement the Wi-Tronix suite in the U.S. as well as in Mexico, where KCS utilizes a strong presence.

KCS management will utilize Wi-Tronix Wi-Tracker[™] to maximize both locomotive asset utilization and fuel efficiency. Wi-Tracker provides a full suite of tools such as: statistics on utilization, engine shut down and duty cycle, fuel monitoring, locomotive fault and exception-based alerting, geo-mapping, and more. Additionally, KCS will save countless hours of invaluable time using Wi-DownloadER that provides remote access to download locomotive on-board data from any locomotive, anytime, anywhere.

KCS will also benefit from automatic monitoring of locomotive digital video recorder health and operating status. Wi-Tronix ultrasonic fuel sensors will provide KCS with real time information such as fuel levels, fuel inventory, refuel events and low fuel alerts. Wi-Tronix array of mobile asset management tools, proven integration experience and customer service is being deployed to support KCS operations throughout North America. "Wi-Tronix Wi-PU places invaluable information at the fingertips of KCS leadership."
